Advance Threshing Muchlnery.

The best and fastest thresher in America, and a machine that stands without a rival. The ADVANCE Thresher has NEVER been REPLACED by any other machine on the Coast, but has replaced several others that HAVE FAHLED to fill WARRANTEE. Why get some OLD STYLE machine because it is cheap when you can get an ADVANCE on the start and do good work in any kind of grain. You do not have to cut and try with the ADVANCE, but start your power, then commence threshing at once. I take the liberty of referring you to the following parties owning ADVANCE Threshers (without their knowledge): Dr. H. A. Davis, Harrisburg, after wasting most of the season trying to run a cheap machine bought an ADVANCE and averaged 2206 bushels per day. M. F. White & Co., Dixie, same experience, but after getting an ADVANCE averaged 2046 bushels per day. Knox Bros., Albany, with a little 28-inch machine averaged 1650½ bushels per day. Henry T. Bold, Spangle, writes, after trying a — machine the best part of the season tought an ADVANCE. Was then able to run without a blacksmith and carpender shop. The ENGINE is guaranteed to pull more than any other, and will outravel all others on the road. If you hear any loud boasts, please tell the parties the ADVANCE THRESHER and ENGINE are sold on their merits entirely. And I am willing to prove all I claim in any field at any time. Do not be humbugged by buying any machine until you see the ADVANCE. I also handle steam fitting goods iron pipe, laundry machinery and many other specialties. One of the Most Exciting Days in the History of Wall Street.

O. & T. GOES UP LIKE A ROCKET.

The Contest for Its Control Ends in a Olose Victory for Villard-That Gentleman Agrees to Issue No New Stock far a While.

New York, May 17—The last hour of business on the New York Stock Exchange to day was marked by the climes, of one of the most exciting chapters of Wall street history, and closed the est fight that has ever been known on the

fiercest light that has ever seen account of the exchange.

The prize for which this battle was fought was the control of the Oregon & Transcontinental Company, a corporation with a capital of \$40,00,000, and holding control of the Oregon Raitway & No igation, the most important railway in the n igation, the most angular actife Northwest.

The control of the company is row held by the control of the company is row held by the control of the contro

HE TOOK THE WHONG MEDICINE.

Bobert Stawart of Petaluma recently had a queer experience. He writes.

"Carboneles and boils afflicted my face and neck for weeks. Finally I procured a bottle of one of the leading sarssparillas. To my surprise it made matters worse. This made malose faith in sarssparillas, but seeing a statement that Joy's Vegetable Sarssparilla died up holis and face gruptions instead of forcing more out as the potash sarssparillas do, I bought a bottle. The effect was estanishing. The earbuncles and boils began to dry up, and in two weeks my face was as well and smooth as ever. My brother also took a bottle with the same benefit. Bought grant of the potash grant of the mineral foddes of potash, which is the hasis of nearly all other sarssparillas, attacks the blood direct, hence forces impurities through the skil, creating more boils and pimples. Joy's Vegetable Sassparilla acts oppositely. Its vegetable sharsparillas acts oppositely. It vegetable alteratives stimulate the various secretive organs and thus eliminate all impurities through the natural channels, hence dries up pimples and skin eruptions at once. In connection with the bottling of our popular KNICKERBOCKER BEER, we have completed arrangements by which we have sole control of the famous WILHOIT SPRINGS MINER L WATER, and we tak this occasion to announce to the Drug and Scda Fountain trade and to the people generally, of our ceing in he market with this, the WILHO," WATER, abo. t March 1st, and from that time on can furnish this WATER in bulk for fountains, or to the trade and families in bottles. This, the MOST FAMOUS of Crepon's natural springs water, needs no recommendation to the people of the Northwest as to its virtues and healing qualities, it now having the most unqualified endorsement of the best known in the medical profession. Our KNICKERBOCKER trade mark and label is always a guarantee of a pure and genuine article.

Is superior to any malt beverage ever drank in the Northwest. We are pressed to our full capacity and are shipping to the trade in every section. Ask for it, get it, and you will stay with it.

It is especially valuable for restaurants and ships, as it is hermetically sealed, takes up but little room and is warranted to keep in any climate.

The best protection for American lead is found in the fact that the product is heavy and that the freight on it is high, so high that it is impossible to ship the ore from the mines of Mexico to the reduction works at Denver and Omnha.

This remedy for the present depression in lead minings is to be found right at home and lead miners hold the power to apply it if they will but long the production of the product of the product of the product of the product and must be handled with more or less care and sheltered from storms while in transit. The freight on a ton of ore from Lewiston to Portiand is \$65 M. It is a staple production of our country lit is a perishable product and must be handled with more or less care and sheltered from storms while in transit. The freight on a ton of ore from Lewiston to Portiand is \$16 M is also a production of our country but is more compact, occupies less space and needs less at tention than a similar weight of wheat. Yet the freight on wheat is only \$6 and on ore \$16. It is this discrimination against the ore product which depresses the mining industry. No industry could be self sustaining with such an enormous tax and the remody I would suggest to Mr. De Lashmutt, is to stay at home and use his influence with the milroad companies to cease their exacting and extertionate discrimination against ores, and to get that class of freight reduced to a more equitable basis. And by the way although I suppose it is uscless to say so, a large reduction plant in Fortiand would do more to build up the welloof metropolia and being more money there than snother transcontinent all railroad.

WHO APPOINTS THE VIEWERS

To the Editor of The Oregonian I notice that mention was made in the council of the fact that of late there has been a great deal of the fact that of late there has been a great deal of dissatisfaction in regard to the assessments for sewers Who has the appointing of the viewers or assessors anyhow? I think they should be selected from among men of experience, old rest dusts, who have knowledge of the value of property I have often wondered why Mr Ferry Henshaw is constantly appointed. I understand he is a salaried clerk so can have but little time to devote to the interests of the public, and as he is a young man and comparatively a stranger here. It is not to be supposed that he has much knowledge of the value of property. He is don't less qualified in the score of being disinterested, as he certainly has very little interest in such matters beyond the pay draw!

Astoria Ploneer Electro Magnetism is the wonder of the Electro Magnetism is the wonder of the sge, and the mode of treatment is the acms of perfection. It penetrates the secret ambush of disease and exterminates it, root and branch, forever It removes the wreathed symptoms of loathsome maladies, and averts its dreadful effects. It cures the most hopeless cases, and relieves acute pains that every known means have falled inwhich are the statement of thousands of persons who have been cured by Drs Darrin, Portland where they are now located and are treating scores of patients daily. The following are a lew open letters that speak for themselves and many more could be added did not the want of space forbid.

Open Letter

Drs Darrin—Gentlemen I now take pleasure in writing to you that after a full course of your electric treatment I am entirely cured of a pain in my chest which has troubled me for over eight years. Having been under treatment by doctors of Liverpool, Glasgow, Calcutta and San Francisco, none of whom did me any good, until I came under your treatment which I am sure has permanently cured me, for which, gentlemen, I beg to remain, gratefully yours.

Ber Experience With Drs. Darrin.

Dr Darrin—Dear Sir I wish to express my gratitude to you for the wonderful results your Electro-Magnetic treatment has done in my case. Three years ago I was stricken with anoplexy—numbness and great pain in my head and neck followed for a long time. Other siffictions came thick and fast I had chills liver and stomach derangements, causing yomitting for weeks. In short, my whole system was thoroughly permeated with malarial poison and continued so until October 1837 when I had a second stroke of paralysis. Hearing of you I put myself under your care and now after three months' treatment I repose to tell you that I am restored to health and can be referred to at Corvallis Or If this will be of service to you publish it. The Oregonian.

The Oregon & Transcontinental owes its existence to Henry Villard He was building the Northern Pacific railroad, the re sources of which were exhausted, and he de sources of which were exhausted, and he de wheed the O. C.T. primarily as a means of raising money to complete it. He suc-ceeded in the main purpose, but at the ex-pense of those who were creditions enough to pin their faith to him and invest thindly in whatever he recommended to them. These persons dropped" twent; two to thirty nallions of dollars in the abyes that opened under "the Villard properties" 1883, but the O & T itself that ought to have perished then but be a kept alive as an instrument of thimble rigging in Walf street, and gen means of disturbance and Oppression to railways whose stocks it has held and consequently to the people secured by the railways upon whose necks

The principal sufferers have been the O.R. & N and the people of the country where this company's lines have penetrated. By the O & T the O R & \ has been heavily handle speed, and indeed almost borne down. The only valuable and cash plying asset of the O. & T. his been the stock of the O. James D Fish the robler expresident of the Marine Nadonal bank of New York that collapsed ancer his management was docongrete from the Auburt pentioniary last Baturday. He is an old third being over "o years of age and was sen enced 11 Isso for year. President Cleveland saw in him a worthy subject for executive clemeter— hence his premature discharge. The argument asking extenuation of his crime on ac count of his age would have more weight were it not used with a stronger showing in behalf of criminals at the other end of the line. What might with propriety be par-doned in a boy of 14 or a couth of 20, would be unperdonable in a rian of four score years, still possessed of sufficient intellect-nal vigor and cunning to rob a national bank and gat away with the proceeds. In view of

the peculations of Jake Sharp, Jim Fisk, Boss Tweed and sundry others less notors out who have from time to time belonged to the old scoundrels' brigade of the metropolis, it would seem that the 'feebte old nam' plea would tack the force and pathos necessary to back up a presidential pardon.

THE LOSS OF THE ALASKAN

The story of the wreck of the Alaskan, as recited by the survivors of the disaster, outlines in experience with adverse wind and wave, the reality of which can scarcely be imagined. The cause of the disaster is fifly in ide known in the simple statement that the vessel could not live in the gale that be

president at the last election has been conerted by the logic of events to the opinion that his 'third party for the present would better furl its colors and bend its energies to the support of high theeme and ocal option Right on the heels of General Fish walks Miss Susan B An hony the leader of the woman suffrage movement for half a century who the omer day bluntly to d the con vention of her suffrage seeking sisters in New York that she was ready to pull down New York that she was ready to pull down her fla. A woman of courage, conscience and rigorous intellect she gave her reasons for the decision to retire from the fight she has waged unceasingly early and late from youth to sid age. Miss Anthony is satisfied. that all these years or agitation have failed to make any permanent impression upon the public mind—bat it was impossible to interest the masses in suffrage and worse than this it was impossible to interest the great masses of nomen themselves. Even when it was publicly offered them they re-fused to accept it. When the leaders sought to impress their cause upon legislatures they were sure to be confronted with the protests of women themselves ' Mias Anthony is too keen a mind not to

have observed also that the acquirement by women of equal legal rights, social advantages and industrial opportunities with man has been so complete that one of the old arguments for woman suffrage has no longer much practical force. So she announced her new departure to the twent; first annual convention of woman suffragists recently held in New York This convention was attended by about 100 women, but included none of the prominent leaders, save Miss Anthony The defection of this woman is the beginning of the end of this agitation Nobody is left in its ranks that is her equal in zemi morai courage, intellect, energy unselfishness and strong sense. Mrs. Stanton is an able woman, but she is 75 years old too old for an agitator. Mrs Julia Ward Howe is nearly, if not quite 70 and she has always been more of briliant essay writer and lecturer than a popular agitator. With the defection of hiss Anthony the woman enfirage party is likely to dwindle gradually down to death. There will always be agitation for the advancement of women, but the peculiar faction. Lat want women to vote and hold office has seen its best day. The trouble with the woman suffrage movement is akin to the fatal weakness of

the prohibition party, to which it has been ailted for the last en vests an ailtance that has brought neither prosperity nor happi-ness to either o the contracting parties Prohibition was an absurd attempt to legislate in outrage of all the experience of his-tory from the middle ages down to the pres-ent date. The political economists of both Europe and Ame Ica the philosophers the moral and social scientists the statesmen and the parists of first rank throughout, the cavilized world are all on record as pro-nouncing prohib tory laws which do not distinguish between the effort to punish a crime and the effort to prescribe the dress and diet of a prople as a hopeless war against the forces of human nature in which are included the personal liberty of the individual under free institutions to decide for himself what he shall eat what he shall drink ont. wherewithal he shall be clothed—always provided that his eating and drinking do not interfere with the common rights of the public which belong to all, and are enjoyed by all. It the drinker gets drunk until interferes with the peace order and quiet of the com-munity he is imprisoned but if he does not by intemperance plague the people the state has no n or il right to violate sound public policy in enforcing total abstinence upon sober Peter because Paul get; drunk Poor in equity tught not to be legally de prived of his social privileges becase Paul has anned them by gross indulgence. The in stricts of human nature are a unit against such absurd legislation as prohibitors, liquor laws, and it is also true that the ratal weak ness of woman suffrage is due to the fact that

its ablest advocates ignore entirely the dom-inant forces of human nature. To illustrate. Why is it that Miss Anthony, after more than forty years or most able effort finds herse f obliged in candor to con fees that it is not only impossible to interest the misses of men in the suffrage but it is imposs be to interest the great masses of It is not because the masses of men are all selfish tyrants or so ignorant or stupid as to be impervious to the appeal of moral justice and public equity but it is be cause the saving political and business common sense of the nasculine governing forces of society teaches them that the law making power should be the bayonet bearing power. since laws are but phantoms except for the sword that is inplied behind the law from this stand point the feminine sneer at negroes and other men of alleged interior brain and intelligence being admitted to the suffrage coses all force, for even men of mediocre intelligence can be trusted for dire emergencies as part of the arms bearing power which is the backbone on which all laws lean that assume to sit unright. The mile common sense of man upright. The intercommon sense of man kind revolt for the misses of women be coming voter and will will ers when the laws which won to be the the for good or all historic visit left with the men will have to furnish the wort. Of course there are exceptional men who by old age or sickness or in times cannot bear arms just as there are women who can inever bear children vet the vast majority of men can bear arms, and the vast majority of women can bear children. But the vast majority of critical women no matter what be their enthu jasm or their fortifude, cannot bear arms and endure the responsibilities of fire field at it if od that are discharged by a mascular cult of the crazy anarchists of the lars commune both in 1731 and 1871 the Precommune both in 1731 and 1871 and 1871 included a first themdoled desexed detravel recent who mardered and pillaged and paged, who with a much pillaged and paged, which a much present and contact as the range of the argument. woman suffragists, but they are indifferent or hostile to the agitation not be-cause of education or the lack of it, not because of religion or the lack of it, not because of intellect or the lack of it, but because the primitive, immortal, indestructible instinct of each woman of the mass, high or low righ or poor, educated or illiterate, is to be more deeply interested in everything her man does and says than in any thing that any woman does and says it is law of sex A man who reads Shakespeard with relish is delighted with his women, be-cause as a man he is interested in the portraval of women rather than of men, and so a woman, it she reads bhakespeare at all, a woman, it she reads bhakespeare at all, cares very httle about his women but a great deal about his men, where they are not purely incarnited depravtices, like Richard, Falstaff Iago or Shylock Let an intelligent man witness' Roneo and Juliet, "and his eyes are fixed on Juliet, while the woman who accompanies him will listen to and witch Romeo. It is the irrepressible instinct of sex the instinction of sex the instinction of sex drawn deeply efficientle distinction of sex, drawn deeply by the hand of nature that makes not only the vast majority of the best and most enlightened men but of the best and most enlightened women, turn deaf or distrustful ears to the plea for woman suffrage. Con anybody tell why a woman does not ask a man to marry her, when she loves him, instead of sealing her lips and waiting for him to speak? It is the instinct of nature that woman shares with the animal creation. In birds and beasts the male is aggressive, the female receptive and civilization has not persuaded woman to reverse the order of nature and court the man rather than be courted by him, and so civilization has not and never will persuade the mass of women to make laws when they cannot bear arms NEW WORLD CONTRIBUTIONS

Figures compiled from records in the office of the British postmaster general show that during last year 391 962 persons in the United States sent money by postal order to relatives in the United Kingdom, the total sum amounting to \$5.250.000 Canada in the same time sent over \$1,000,000 and Aus-tralia and South Africa swelled the aggregate to \$9.000,000 or an average of \$30,000 a day from nearly 700,000 contributors. Much, if not the most of this, went to assist friends ting industry can never hope to get beyond a hand to mouth itving.

There is no doubt however, that film devotion, recognizing the fact that old persons, or persons past middle life will not bear transplanting, happily supplies in the aggregate large sums yearly for the maintenance of parents in old homes, and amid familiar surroundings. Next to absolute want the homesickness of a person, whose incentive to active endeavor has vanished with the strength that enabled bim to make and strength that enabled bim to make and carry out plans, is productive of the most dreary misery. The passing from one part of this country to another involves a decided change in manner of living and of the small details of home and neighborhood that becomes a part of the life of every man and woman in the common ranks who has passed the half century. Naturally, these do not take readily to new methods and habits of living. The to new methods and habits of living. The transition from the old countries to the new that it induces is rarely, if ever, overcome by oid or elderly persons. Hence he is a wise, unselfish man, or she is a humane, thought ful woman who responds to filial duty by sending money when necessary and possible to maintain the father and mother in the old home where harpmess is still possible for them, rather than to must upon a change that, while it may benefit them financially, will embitter the closing years of their lives

with homesickness The young man who sends for his sweetbeart to join him after he has made a start in the new world or the far West does a wise thing and one that promises happiness and prosperity to both, he who sends a friend, brother, or capable, industrious sister in the old country money enough to come to the United States does a generous thing but he who sends of his earnings such a sum as he can afford to keep his parents comfortable and happy in the old home performs an act of thoughtful kindness that surpasses com

of his doings after the Alaskan sank

Edwest managed to stick to a piece of floating deek for thirty three hours, a reporter bunted him up yesterday and obtained the following history of his doings after the Alaskan sank. "It was about 2 is Monday morning when the steamer went down under mi stern first and broke in two ambidishps. I was steading forward on the hurricane deek by the pilot house when she went down. I was carried down some distance and when I came to the surface I found a piece of the roof of the house about thirty feet square, floating upside down, and I got en it. "What every one wants to know Captain, is how you managed to stick to it in such a gale."

"It was upside down and the chos or beams gave me something to hold to There was a small hatch in the middle of it, and when I saw a big see coming I put my arm through titls hole till it went over me. As some as I got on the raft I looked around and saw Chiel Engineer Swain on a small raft about twenty yerds away. As the moon shone out between squals I saw who he was, and I saw saverai others on pieces of wrock age and on a life raft and called to them but could diffied till we were close together. In the pilot house was fixed and told him he had better come to me was fixed and told him he had better come to me was fixed and told him on the raft. I got a long bord and reached and diffied till we were close together. In the pilot house but found it impossible. About 8 of clock Brain said he would ake two planks and try to get to the pilot house. The men on the pilot house, who were peck up Monday evening, toll me when I got abourd the Vigitant that they saw him fiest past about the water alored was firm to stay but he said he would are two planks and try to get to the pilot house. The men on the pilot house, the last I saw of him he was shout hail way to the pilot house. The men on the pilot house is the pilot house. The men on the pilot house and they shouted to him and he looked round and was immediated some planks on he erst for a sort of each to keep me out of the week agon at su

FIRST OFFICER WOOD BEFFERENCES
First Officer J T Wood furnished an Orzoonian
sporter the following account of his experience

It was about 1 30 on Monday morning when I cart off from the Alaskan about three quarters of an hour before she went down. There were five men bealdes myself in the boat two quarter masters, one of whom, Georgs Shielderup had his leg broken just above the angle by being caught between the wheel and the deck so that his foot bung by the tendons an other deck hand and waiter. We get out the ores and tried to pull up under the lee of the steamer to stand by till she went down but the oars were so large and the men not striled in handling them and we could not make much beadway and were in danger of being upset by the less strik in gagainst the oars. I lashed three ours together in the shape of a triangle for a drag, and weighted them with same tron to sink them. This drag I made fast to the painter, and put it out aheat, and it acted as an anchor She could not be kept from burying under the stand of the strength of badder the shipped less water I then rigged up two oars with the flat blades for a sail, and with the wind and current we drilted fasting them we drilted fasting the time it was getting daylight and we "by this time it was getting daylight and we

sall, and with the wind and current we drilled instart has the wreckage could apo "By this time it was gatting daylight and we drilled this bout 10 o clock, when we handed in the drag and took the care down to give the men accrose, as they were getting cranned and atiff I opened a can of peaches and divided it around giving each a piece and a sup of the juice and then we put out the oars and pulled back to wind ward toward the wirek. We passed lots of wreck age, and looked around through it to see if there was anyone on it

ward toward use the age, and looked around through if to see if there was anyone on it if it blew hard all the afternoon and I rigged the drag again, and we remait all hove to not night the man were uncomfortable and all winds to pull ashore, but I would not let them. Foor sheldrup with his broken teg lay in the bow of the boat. He had lot a great deal of blood and I had tied up his leg with a bandkerthief and mad at hwart plu for a toward quet and topped the flow of blood and wrapped a cout around it and put it in a bucket to prevent anyone from trampling on it, and be was quith confortable He had good grit and look notice of everything that was going on.

and and Seymour Witts the second officer, the Astorian 1872

Many were the expressions of regret heard was terday regarding the sad fate of Al Rables, the veteran river and ocean stanner steward who was so well known it wo many in Astoria. He came out here in 1801 to run on one of Capitain Flavill's vessels and has been a familiar figure on board in the rate of this victim. This city but resided in Portland where he leaves a wife and six children the edect of whom is a boy 17 years old. He was a brother of Mis. John A. Devlin and a general favorite here.

Of course it is by no means certain that he was drowned but the wast is feared. He was on the upper deck aft the pilot house, near the waiking beam, when the flush crash-came Brown and Shurman were with him. They said they put a life preserver on him and a life in the around him but he refused to go, and that when the vessel split in two hed daspecard, and they thus he was hit by a piect of machiners and carried below the provided of the city, a single man 40 years of age, who had been here about two years. He had a present ment of disaster and told his brother five minutes before leaving that if he could get a decent excuse he would back out and not go.
